

Void main Technologies

SNO	TITLE
1.	Automatic plant irrigation based on soil moisture and monitoring over IOT
2.	based Smart Roads Intelligent Highways with warning messages and diversions according to climate conditions and unexpected events like accidents or traffic jams
3.	Dam gate level monitoring for water resource analysis and dam gate control over IoT
4.	Green house monitoring and weather reporting over IoT (Rain, atmospheric temp and Humidity)
5.	Heart beat and body temperature monitoring over IoT.
6.	Industrial automation over IoT.
7.	Industrial DAQ and controlling system using over IoT.
8.	Forest fire Detection and Fire Controlling Robot.
9.	Industrial Broiler temperature monitoring and alerting system.
10.	Mine detection Robot.
11.	Smart Environmental parameters monitoring system.
12.	Smart lighting intellignet and weather adaptive lighting in street lights for efficient use of power.
13.	Underground Coal Mine Monitoring and alerting Robot.
14.	Garbage dustbin management system and reporting over IoT.
15.	petrol dispensing station level monitoring using magnetic sensors and reporting over IoT.
16.	PV solar panel grid and battery voltage monitoring over IoT.

Void main Technologies

17.	Remote Industrial device control over IoT.
18.	Traffic data monitoring over IoT for easy transportation alternative route selection.
19.	Visitor counters for museums and data posting to IoT.
20.	Air Pollution Monitoring and Alerting System to Prevent environment.
21.	Smart energy meter with auto tariff calculation over internet.
22.	Toll Booth Manage System.
23.	Automatic movable railway platform with train arrival detection and monitoring over IoT.
24.	Drunk and Drive detection
25.	Secure Embedded Electronic Door.
26.	Smart zone based Vehicle Speed control and avoid accidents.
27.	Bus tracking system using RF communication for passenger information over IoT.
28.	Automatic gas cylinder booking over IoT.
29.	Public water supply grid monitoring using IoT and avoid underground pipeline problems
30.	Coalmine safety
31.	petrol dispensing station level monitoring using magnetic sensors and reporting over IoT.
32.	PV solar panel grid and battery voltage monitoring over IoT.
33.	Remote Industrial device control over IoT.
34.	Traffic data monitoring over IoT for easy transportation alternative route selection.
35.	Visitor counters for museums and data posting to IoT.
36.	Air Pollution Monitoring and Alerting System to Prevent environment.

Void main Technologies

37.	Smart energy meter with auto tarrif calculation over internet.
38.	Toll Booth Manage System.
